

WE'RE HIRING

Role : Executive/Sr. Executive – Fullstack Developer
Department : Technology
Location: Mumbai

Job Role:

Learning the codebase, gathering user data, and responding to requests from the lead.

Job Responsibilities:

- Gather and analyze requirements from stakeholders.
- Develop and implement solutions based on requirements.
- Independently develop and manage in-house applications.
- Collaborate in the development of features across multiple subsystems, including requirements definition, prototyping, design, coding, testing, and deployment.
- Understand the structure and operation of our applications, as well as customer usage.
- Act as a technical expert in stakeholder interactions concerning product subsystems.
- Investigate, analyze, and recommend technology improvements, upgrades, and modifications to management.
- Expertise in designing, implementing, and maintaining Java application phases.

Job Specification:

- Master's degree in Information Technology, Computer Science, Engineering, or related field.
- Minimum of 2 years of experience
- Hands-on programming experience in Java and JavaScript
- Development experience with Spring, Spring Boot, Hibernate, and Service-Oriented Architecture
